- SQL

PROFESSIONAL EXPERIENCE

AMBITION

July 2024

HACKTHON

- Led a team of 4 to build a MERN-based full-stack accident detection system, achieving a 4-second response time.
- Trained and deployed a machine learning model with 95% accuracy for reliable incident detection.
- Oversaw frontend development for smooth user experience and built a robust backend to manage ambulance driver operations.
- Integrated 4+ key features that improved real-time emergency response efficiency.

PROJECT

AI Assistant

NOV 2024

- Developed a voice-enabled virtual assistant using Node.js, Express.js, and Gemini API to answer user queries in real time.
- Integrated speech-to-text and text-to-speech features for seamless voice interaction.
- Designed and deployed secure backend APIs to ensure smooth and reliable frontend communication.
